EDUCATION

BS Mechanical Engineering

University of Arkansas, Fayetteville, AR - Expected Graduation: May 2029

GPA: 3.5

SKILLS

- **CAD:** Autodesk Inventor, SolidWorks, Fusion 360, Onshape
- **Manufacturing:** CNC Machining, Prototyping, Fabrication, Assembly
- **Programming:** C++, Python, Java
- **Engineering:** Mechanical Design, Design for Manufacturing, Technical Documentation

PROFESSIONAL EXPERIENCE

Manufacturing Engineering Intern — Danfoss, Mountain Home, AR September 2024 - August 2025

- Documented manufacturing processes to allow for in-house machining of parts used in the assembly lines
- Designed a rubber-detection mechanism to reduce defective product
- Redesigned a failsafe part on yarn braider system to be more intuitive and easier to use, in order to improve the experience of the operators

ENGINEERING PROJECTS & LEADERSHIP

Obsidian, FIRST Robotics Team 5454 — Robot Design Mentor December 2025 - Present

- Teach high school students mechanical design, engineering problem solving, and how to think through manufacturing
- Design parts for the robot, such as vision system mounts in 2026 season

Design & Manufacturing — Bomb Squad, FIRST Robotics Team 16 September 2022 - April 2025

- Led mechanical design and design strategy using Autodesk Inventor, along with CNC machining, prototyping, and assembly
- Designed, prototyped, machined and assembled 2025 robot's climber, a major subassembly
- Redesigned the climber after competition testing to fix known and newly found issues, making it more reliable, easier to use, and lighter
- Helped the 2025 team finish 5th in the world out of over 3,000 teams
- Prototyped, machined, and assembled 2024 robot's intake
- Mentored a middle-school FIRST LEGO League team in coding and robot design, and received the Mentor Award at the Arkansas state competition
